Subject Index to Volume 38

δ-rule, 31

abstract completion procedure, 303
abstract deduction procedure, 303
abstract rewriting, 303
ACL2(r), 273
analytic tableaux, 127
Asymptotic equations, 353
ATP, 261
automated reasoning, 57
axiomatization, 303

benchmarking, 261
Big O, 353

concrete domains, 227
connection method, 3
countermodels, 201

decidability, 227
decision procedures, 201, 353
description logic, 227
disconnection calculus, 57
disconnection tableaux, 79

equality handling, 127

first-order logic, 3
free-variable semantic tableaux, 31
free variables, 3

Gödel-Dummett logic, 201
graphs, 201

ILTP, 261
interval temporal logic, 173
intuitionistic logic, 261

knowledge base, 155

nonstandard analysis, 273

primal partial instantiation, 57
problem library, 261

query processing, 155

reduced implicate trie, 155
resolution-based instance generation, 57
rewrite system, 303
right propositional neighborhood logic, 173

sequent calculus, 201
Skolemization, 31
superposition rules, 127

tableaux-based decision procedures, 173
tableau algorithm, 227
tableau calculus, 3
theorem proving, 57, 79, 273

variable splitting, 3
